

GNSS system i93.

Mätsystem i93 kombinerar GNSS och fotogrammetri för att snabba upp och förenkla inmätning och utsättning.

i93 VISUAL IMU-RTK GNSS-mottagaren är en extremt mångsidig GNSS RTK som integrerar de senaste GNSS-, IMU- och dubbla kameror, vilket ger snabbare och enklare mätning. Genom att införliva CHCNAVs senaste visuella navigering och utsättningsteknik, ger den visuella 3D-utsättningsfunktionen oöverträffad användarvänlighet och komfort, vilket omedelbart ökar effektiviteten för alla mätprojekt.

Med i93:s integrerade kameror sker inmätning och utsättning visuellt. Visuella mätningar förenklar punktmätningar utan behov av komplexa offsetmetoder att kartlägga tidigare svåråtkomliga, signalobstruerade eller farliga platser. Snedbilder från i93 kan också användas för att komplettera fotogrammetri från drönare.

Med sina avancerade funktioner och banbrytande teknik är i93 den idealiska lösningen för proffs som utför mätning, mer exakt och mer effektivt än tidigare.

Mätsystem i93 Integrerar:

- GNSS RTK-mottagare med stöd för alla satellitsystem.
- Automatisk kalibreringsfristångslutningskompensering.
- Visuell utsättning
- Visuell inmätning
- Integrerad UHF modem med protokoll för de populäraste formaten.
